

LIGNO SULFO NATES

LIGNO

COMPLEXED MICRONUTRIENTS
DEFICIENCIES CORRECTORS

What is LIGNO?

The correctors LIGNO meet all the requirements for sustainable agriculture and offers farmers an efficient and natural source of micronutrients.
LIGNO is safe to use because it is not phytotoxic and is environmentally friendly.

- Complexed Micronutrients
- Correctors of deficiencies
- For application Foliar/Soil
- High Quality
- Natural complexing agent
- Natural origin

What is LIGNO?

Sulphonic groups present in the LIGNO molecule:

- Increase penetration in the leaf, under relatively low humidity.
- Optimize foliar coverage, because they increase the superficial tension.
- Minimize the risk of phytotoxicity because its hygroscopicity spraying stays wet for a longer time.
- They are compatible with anionic and nonionic compounds, wetting agents, fertilizers and most pesticides. Not compatible with oils.
- Is a Bio-Degradable polymer and supportive of soil microorganism.

LIGNO Benefits

- Correct and maintain proper nutrient levels.
- Compatibility with fungicide and insecticides.
- Single element and elements combination available.
- Healthier plants endure adverse weather, disease and pest conditions.
- Excellent source of organic Carbon and Sulfur.

LIGNO can be applied to vegetables, citrus, fruits, nuts, ornamentals and turf for correction or maintenance of plant nutrition
